(1) The inventions described in claims 1-8 appear to be novel and involve an inventive step over the documents cited in the ISR. None of the documents describes that "a hydrolysable metal compound vapor and a water vapor are mixed in advance, and the mixed vapor is brought into contact with a base within three seconds from the mixing," and this point could not be easily conceived of by a party skilled in the art based on any of the above documents.

(2) The inventions described in claims 9-16 appear to be novel and involve an inventive step over the documents cited in the ISR. None of the documents describes "comprising a porous nozzle and slit nozzle, wherein the nozzles are disposed in a direction so that the spray streams therefrom meet," and this point could not be easily conceived of by a party skilled in the art based on any of the above documents.
